Skills

- Java
- Python
- C
- Javascript
- CSS
- HTML
- React
- Git
- MySQL
- Spring Boot Framework
- NodeJS Framework

Soft Skill

- Fast-paced Adaptability
- Organized workflow
- Time Management
- Prioritize important tasks

Languages

- Portuguese fluency
- English C1
- Spanish B2

Certifications

- Google Cloud Foundations
- Oracle Cloud Foundations

Employment Timeline

AGERGS **June 12, 2023 — March 7, 2025**

- Develop a quickly script in C for great CSV files with hundreds of thousands of rows, looking for key-words set by user to filter out onto another file.

Academic History

FADERGS

Computer Science bachelor Degree 2022 — 2025

Software Projects Development

Database Connector

- Designed and built custom Java-based fluent query engines, leveraging architectural design patterns like Singleton or Builder to generate SQL
- Integrated cybersecurity measures at the code level, such as compiling libinjection, a C-based library, via Java Native Access for SQL injection prevention.

Fullstack Project - Portfolio

- Implementation of renowned framework Spring boot and NodeJS into one big repository project.
- Apply development, testing and production environment concept for organized software development.
- Full acknowledged of areas of full stack projects, from it's relations between backend server and frontend client interface to implementation.
- Successfully upload the frontend webpage to production environment with Github Pages by setting up the .yaml file
