Skills

- Java
- Python
- C
- Javascript
- CSS
- React
- Git
- MySQL
- Spring Boot Framework
- NPM

Soft Skill

- Fast-paced Adaptability
- Organized workflow
- Time Management
- Prioritize important tasks

Languages

- Portuguese fluency
- English C1
- Spanish B2

Certifications

- [Google Cloud Foundations](#)
- [Oracle Cloud Foundations](#)

Employment Timeline

AGERGS

June 12, 2023 — March 7, 2025

- Develop a quickly script in C for great CSV files with hundreds of thousands of rows, looking for key-words set by user to filter out onto another file.

Academic History

FADERGS; Rio Grande do Sul, Brazil

Computer Science Degree

2022 — 2025

Software Projects Development

Database Connector

- Designed and built custom Java-based fluent query engines from C.R.U.D, leveraging architectural design patterns like Singleton or Builder to generate SQL
- Integrated cybersecurity measures at the code level, such as compiling [libinjection](#), a C-based library, via [Java Native Access](#) for SQL injection prevention.

Fullstack Project - Portfolio

- Implementation of renowned framework Spring boot and NodeJS into one big repository project.
- Apply development, testing and production environment concept for organized software development.
- Full acknowledged of areas of full stack projects, from it's relations between backend server and frontend client interface to implementation.
- Successfully upload the frontend webpage to production environment with Github Pages by setting up the .yaml file
